About

SE 491 Med Fleet is a web application that allows users to monitor the status of medical drones in real-time. The application is designed to be user-friendly and easy to use, providing a clear overview of the fleet's current status and location. Users can view a map of the fleet's location and status, and can also view detailed information about individual drones, including their flight history and current status. The application is built using a modern web framework and is designed to be scalable and secure.
